Challenging behaviour and learning disabilities

May 29, 2015 - intellectual ability. Although the term ‘intellectual disability’ is becoming accepted internationally, ‘learning disability’ is the most widely used and accepted term in the UK and is therefore used in this guideline. The amount of everyday support a person with a learning disability needs will depend mostly on the severity of the disability.

Disability stigma in developing countries - GOV.UK

Tackling disability stigma is challenging because reactions to it are compounded by other social attitudes (to women, ethnic and religious minorities) and by poverty, which needs to be taken into behaviour. It is suggested that to be effective, efforts to address stigma need to use a (intellectual) disability stigma.

CHAPTER 2 LITERATURE REVIEW 2.1 Stress at Workplace
Signs of stress can be seen in people’s behaviour, especially in changes in behaviour staff morale in community-based services for people with intellectual disability. The list of factors derived by Hatton et al. (1999) can be grouped into several staff beliefs about and emotional reactions to user challenging behaviour, and the
